Hi I'm Pierre Avisse,
I'm a Fullstack Developer

Info

pierre.avisse.important@gmail.com
Paris (not willing to relocate)

Experience

TechYourLab · *Side project*
Since Jan. 2020

Creating a SRE oriented MOOC platform as a side project, it packed an in app webshell spawn as needed for the courses, a test area and many more features.

Veepeez · *Fullstack*
Oct. 2017 - Nov. 2019

Intrapreneurship project at Station F (The World's Biggest Startup Incubator) for veepee (formerly known as vente-privée).
Development of a new mobile application focused on a new social shopping experience targeting millennials.

Veepee · *R&D Intern*
Jan. 2017 - Oct. 2017

Internship at Veepee inside the research and development lab in partnership with my school 42, while there worked on a 3D scanner using photogrametry, an idea aggregator/hackathon manager and a candidate selection plateform.

Topito · *Intern*
Jul. 2014 - Nov. 2014

Topito is a french humour website, where everything is a top list.
I Worked on a make-over of the administration panel and adding an polling system to let user vote

- AWS
- Sketch

Education

42, Paris
Nov. 2013 - Nov. 2017

42 Is a free programming school created by the French entrepreneur and philanthropist Xavier Niel, I've been from the first promotion.
While there I learned most of my skills and how to adapt to all situation.
The first year of the cursus is mainly C and unix, later years are more open to diverses languages.

Hobbies

Coder dojo · *Mentor*
Since Dec. 2015

Coder Dojo info-date is an association where children, old enough to type on a keyboard, come to learn programming.
Younger ones learn scratch, a blocked based programing interface, and will later learn HTML or create basics mobile applications.

Dot conferences · *Volunteer*
Nov. 2015 - Nov. 2018

Helping setting up and the tech conferences
DotGo, DotJs, DotCSS, DotSwift ...

Mycraft · *Volunteer*
2010 - 2013

Creating mods, managing Unix servers and people on a multi game community (principally minecraft)
